Agenda for Today

1. Q&A
2. Reminders
3. Lab Time
Lab Questions

The test program works, but our allocator doesn't work with LD_PRELOAD and other programs. It just exits quietly.

   Make sure you aren't calling exit() in your allocator, except if mmap fails.
   There could be a segmentation fault during program startup.
Reminders
Reminders

Lab
The memory allocator lab is due tonight

Reading
Read about proportional share and multiprocessor scheduling for Friday
